

Turn- Key Investment Brochure

Our Turn-Key Investment service allows you to become a real estate investor with minimal capital, and minimal effort. Complete Housing and our contractors handle every aspect of your real estate investment including:

- Construction
- Finding tenants
- Maintaining and managing the property
- Finding and purchasing land
- Collecting rent payments
- Selling property
- Facilitating payment of property taxes

What makes this a good investment opportunity?

Affordable housing in Accra is in low supply and high demand and the gap is increasing.

Based on a 2021 study by Numbeo, Accra was ranked as the 2nd most expensive city in the world when comparing housing prices to incomes. Most developers have focused on high and mid-end properties, leaving a shortage in affordable housing options, especially in Accra. At the same time, the population of Ghana

is currently growing at a rate of approximately 2% per year and is very young with an average age of 21.51. Accra's population has grown from 2.9 million in the year 2000 to over 5.45 million today according to Ghana Statistical Service.

According to the Ghanaian Ministry of Works and Housing, Ghana has a shortfall of 1.7 million affordable housing units, and it is continuing to grow.

“Every year we are only able to deliver to the market about 40,000 [housing units],” said parliament majority leader Osei Kyei-Mensah-Bonsu. “Per year we require about 110,000, i.e., about 30% of housing needs. So, there is always a deficit of about 60,000 to 70,000 per year.”

In 2018 the government signed an Memorandum of Understanding with the United Nations Office for Project Services (UNOPS) to build 100,000 low-end units at Afiaman near Amasaman in Accra. In February 2019, the government entered a private-public partnership with the Hungarian company Solin to build 10,000 affordable houses across the country.

in 2021 the Ghanaian government purchased 4,500 acres of land in Greater Accra and Kumasi to build 2,803 affordable housing units. The government also create a plan to build 100,000-250,000 affordable housing ever year for the next 4-5 years.

Clearly, there is an insufficient supply of affordable housing with a demand that is continuing to grow and will likely continue to do so for many years. Due to these market conditions, finding tenants for renting your units or buyers to re-sell them should be relatively easy.

Quick and Affordable Construction

The properties can be built in less than 90 days, and the total cost with the land can be kept below \$20,000. Furthermore, because of the property's size of less than 25 sq meters, you can build multiple properties on a plot of land, bringing the cost of your subsequent investments down to \$15,000 or less.

How much can I expect to make from renting one of these properties?

The rental price is at the discretion of the investor; however, we will provide advice on pricing based on locations and market conditions. For most locations in Greater Accra, the investor can expect to receive \$170-250 per month per unit in net revenue, or \$2,040 to \$3,000 per year. The cost of property management will be 8-10% of net revenue, and the owner will be responsible for covering the cost of routine maintenance.

What if I want to sell the property?

When you want to sell the property, we will help you every step of the way. We will find buyers for you, facilitate the process, and keep you in the loop from the beginning to the end. Our sales fee is 2.5% of the final sale value.

How will I receive my proceeds?

Receipt of proceeds is highly flexible. You can receive your payments via international wire transfer, ACH bank transfer (for USA investors), bank to bank transfer (for Ghanaian investors), or via cryptocurrency (any available on Binance or Coinbase). You can choose to receive your payments monthly or quarterly, and in the currency of your choosing.

What's your process for vetting tenants?

Our process involves a criminal background check, a financial review, and a face-to-face interview. We will compile this information for you and send it to you to review before accepting the new tenant.

Where will the properties be located?

The properties can either exist on our developed estates, or you can choose to build the property in a different location within Greater Accra.
